

Nortex Industries — Travel Settlement take-home

Vamshi Sirisenagandla · React + NestJS + PostgreSQL · 2-page note

Problem

Employees spend ~25 minutes copying a messy inbox into Excel, then chase Finance. Goal: auto-draft the settlement, apply policy in the open, and show status so nobody follows up.

What I built

- Sign in / sign up from employee_master.csv. Pick the person; accounts are not invented.
- New request: Domestic travel → destination / dates / mode / estimate / advance.
- Bengaluru attaches the 15 pack emails. Flights, duplicates, promo, Deepa's cab dropped.
- Laundry / minibar shown as disallowed, not hidden. Advance netted. RM → HoD → Finance.
- Stack: React (Vite) + NestJS + Prisma + PostgreSQL. Policy engine: 12 unit tests.

Walkthrough

1. Sign in

Nortex

Reimbursements that explain themselves.

One place to raise a claim, see the policy that governs it, and follow all the way through to payment.

Requests that show themselves. This category — Domestic travel — and the forms, policy and approval chain come with it.

Automatic, not mysterious. The pack inbox is classified, you'll confirm the right time.

Every step on the record. Manager, HOD and Finance each get with-invoice kept.

Claims

Raise a request

Pick a category — In form, approvers and policy checks follow from it. For this assignment the right choice is **Domestic travel** (Chaitanya's Bengaluru trip in the past).

Domestic travel

File trip request with booking or advance if you need one, and settlement against your bill.

Travel request — Trip request - Advance - Settlement - Process - Claim

Start →

Cash advance

Money up front for planned spend, settled against credit/debit when it's done.

Chaitanya Reddy chaitanya.reddy@nortexindustries.com NX-4471 sends the request
Suresh Iyer suresh.iyer@nortexindustries.com NX-2210 manager approval
Meera Krishnan meera.krishnan@nortexindustries.com NX-1108 HoD if claim > ₹25,000
Ravi Menon ravi.menon@nortexindustries.com NX-3305 Finance verify / pay

Assumptions / left out

- Receipt PNGs were transcribed, not OCR'd. No live Gmail, Stripe, or workflow designer.
- Pack inbox attaches only if destination is Bengaluru (the trip in the pack).
- I did not clone the Loom admin canvas. The pack is the spec; the video is the workflow shape.

Where it breaks

- A new email layout needs a new rule. That is deliberate so every line is explainable.
- Run API: cd backend && npx prisma migrate deploy && npm run seed && npm run start:dev
- Run UI: cd frontend && npm run dev → http://localhost:5173
